Dear friends and customers,

I am pleased to present my new catalogue. Most of my book stock was gathered in the last 20 years and contains many rare and seldom offered items. I hope you will find something of interest in this catalogue, otherwise I am in the position to search any book you find difficult to obtain. Please send me your want list. I am always interested in buying books, journals or even whole libraries on all fields of science (zoology, botany, geology, medicine, archaeology, physics etc.). Please offer me your duplicates.

Terms of sale and delivery:

We accept orders by mail, telephone, fax or e-mail. All items are offered subject to prior sale. Please do not forget to mention the unique item number when ordering books. Prices are in Euro. Postage, handling and bank costs are charged extra. We are required to charge our EU customers 6% VAT (TVA, BTW) unless they possess a VAT registration number and live outside of the Netherlands (please quote your VAT number when placing orders!). Books are sent by registered surface mail (unless we are instructed otherwise) upon receipt of payment. Confirmed orders are reserved for 30 days. If payment is not received within that period, we are in liberty to sell those items to other customers. If you pay by cheque we have to add € 10,- bank charges. Return policy: Books may be returned within 7 days, provided we are notified in advance and that the books are well packed and still in good condition. Full refund.

Natuurkundige Uitspanningen, behelzende eenige waarneemingen, over sommige Zee-Planten en Zee-Insecten, benevens derzelve zaadhuisjes en ijernesten; Two vols in one. 169, [4], 167, [4] p., 29 plates of which 27 are hand coloured, contemporary half, spine gilt, boards covered with Dutch marbled (spickled) paper (a few pieces of paper missing), outer edges with wear due to use, but spine is complete and binding is tight. Old library ex libris at verso front cover. A few pages with some faint foxing but the great majority of pages and all plates clean. Baster's book appeared in six instalments, each with a separate title-page which were often discarded when bound (they are not present in this copy), and replaced by two general title-pages for the volumes (as in this copy).

Baster's book has become famous for being one of the first describing and depicting a local marine fauna, and including the smaller, less obvious animals in his works. His book has become very rare, and we have the pleasure to offer a first Dutch edition (dated 1762-1765, but actually appeared between 1759 and 1765) with almost all plates hand coloured.

We also have on offer the work by Slabber (1769-1778) who followed in Baster's footsteps; please inquire.

De quibusdam animalibus marinis, eorumque proprietatibus, orbi litterario vel nondum vel minus notis, liber; [18], 169 p., 12 folded engraved pls, title-page with vignette, and another large vignette depicting a portrait (of the author?), contemporary full calf, spine gilt (skilfully rebacked), contemporary marbled end papers. Small, faint library stamp on title-page. A little unobtrusive worming in the inner margin of first few pages. Some scattered foxing spots but mostly clean.

The scarce first edition, there was a later German edition in 1776. This work mainly treats Molluscs (Mainly Nudibranchs) and Coelenterates. The first five plates depict Seahares and Nudibranchs and their anatomy, Plates 6-7 depict Holothurians, Plates 8-9 depict Coelenterates (Sea pens and Alcyonaria), Plate 10 depicts Tunicates, Plate 11 depicts shark and ray's eggs, Plate 12 depicts eggs of Squid. Johann Babtist Bohadsch (1724-1768) was a scientist from Prague who visited Italy in 1757-1759 and studied and draw lesser known marine invertebrates. Caprotti p. 46.

Études sur les animaux ressuscitants. Rapport lu à la Société de Biologie, les 17 et 24 mars 1860, au nom d'une commission composée de MM. Balbiani, Berthelot, Brown-Séguard, Dareste, Guillemin, Charles Robin; 139, [3] p.; 1 plate, disbound (no covers).

Broca was the rapporteur for the committee of the Société de Biologie investigating the phenomenon of the revival of dessicated organisms, such as rotifers, after they had been brought in contact with water. The committee sought to answer the question whether, in such cases, a dead organism had been brought back to life or a living organism had passed from a passive to an active state.

We added two papers on the same subject: Gavarret, ca. 1860. Quelques expériences sur les Rotifères, les Tardigrades et es Anguillules des mousses des toits (16 p.) & Fromentel, 1877. Recherches sur la revivification des Rotifères, des Anguillules et des Tardigrades (16 p.).
