Dear friends and customers,

I am pleased to present my new catalogue. Most of my book stock was gathered in the last 20 years and contains many rare and seldom offered items. I hope you will find something of interest in this catalogue, otherwise I am in the position to search any book you find difficult to obtain. Please send me your want list. I am always interested in buying books, journals or even whole libraries on all fields of science (zoology, botany, geology, medicine, archaeology, physics etc.). Please offer me your duplicates.

Terms of sale and delivery:

We accept orders by mail, telephone, fax or e-mail. All items are offered subject to prior sale. Please do not forget to mention the unique item number when ordering books. Prices are in Euro. Postage, handling and bank costs are charged extra. We are required to charge our EU customers 6% VAT (TVA, BTW) unless they possess a VAT registration number and live outside of the Netherlands (please quote your VAT number when placing orders!). Books are sent by registered surface mail (unless we are instructed otherwise) upon receipt of payment. Confirmed orders are reserved for 30 days. If payment is not received within that period, we are in liberty to sell those items to other customers. If you pay by cheque we have to add € 10,- bank charges. Return policy: Books may be returned within 7 days, provided we are notified in advance and that the books are well packed and still in good condition. Full refund.

TA01096 **ANONYMOUS, 1939.** €20,00

Ruwenzori Expedition 1934-5. Vol. 1 no. 1. Introduction with list of localities; 9 p., 2 maps, 20 pls, paperbound. Ex libris.

TA07073 **BARNES, J., 1817.** €480,00

A Tour through the Island of St. Helena, with notices of its Geology, Mineralogy, Botany, &c. &c. Collected during a residence of twelve years, with some particulars Respecting the Arrival and Detention of Napoleon Buonaparte; xx, 239 p., new hcalf. Title-page browned. Portrait of Napoleon is missing, but a photocopy of it is added. First description of the arrival and detention of Napoleon on St. Helena, published during his life. Includes also a list of native plants mostly drawn by Dr. Roxburgh. Very rare.

TA05264 **BRUCE, J. (TRANSLATED BY S. ÖDMANN), 1795.** €180,00

Jacob Bruces Resa genom Abyssinien. I Sammandrag med Anmärkningar af Samuel Ödmann. Parts 1-2 (complete); [28], 388, [20], 389-780, [10] p., contemporary hcalf (worn). First blank end-paper missing. Ex libris Reinhold Charpentier. Title-page with some marginal soiling and with worn edges. First (and only?) abridged Swedish translation.

"Bruce arrived in Alexandria in 1768 having determined to discover the source of the Nile, which he believed to be in Abyssinia. He reached Kossier via Cairo and Thebes where he embarked in the dress of a Turkish sailor for Jidda. He eventually reached Gondar in Abyssinia in 1770 where his linguistic skills, resourcefulness and courage made a fine impression, especially upon the Negus and Ras Michael. He stayed there for two years before finally reaching the source of the Blue Nile, and in 1771 he also found its confluence with the White Nile having surmounted numerous difficulties. This work is particularly important for its portrayal of Abyssinia, little-known to his contemporaries, for its literary merits, and for the final volume on natural history, in spite of the incredulity with which his account was originally received." (Sotheby's, The Library of Henry M. Blackmer II, p. 213.).

TA00394 **HOHNEL, L. VON, 1894.** €900,00 [Picture on our website!](#)

Discovery of Lakes Rudolf and Stefanie. A Narrative of Count Samuel Teleki's Exploring & Hunting Expedition in Eastern Equatorial Africa; 2 vols. xxxii, 832 p., num. figs & pls, 2 folded col. maps, 2 frontispieces (portrait & map), brown decorated publisher's cloth. Rebacked, outer ends spines and corners of covers somewhat used, otherwise a very nice clean set.

The account of the exploring and hunting expedition of Count Samuel Teleki in 1887 and 1888 in Eastern Equatorial Africa. Teleki, a Hungarian nobleman discovered lake Turkana and travelled to the foot hills of Kilimanjaro during the course of an arduous journey, which brought back much important geographical and scientific information. The appendixes at the end comprise: the game-book of Count Teleki and an abstract of the scientific results of the expedition (species lists of reptiles, amphibians, insects and flora).

TA00453 **JEANNEL, R., 1934.** €75,00

Un Cimetière d'éléphants. Mission scientifique de l'Omo; 159 p., 48 pls, 1 folded map, decorated cloth.

TA00013 **VAILLANT, F. LE, 1791.** €390,00

Voyage de monsieur Le Vaillant dans l'intérieur de l'Afrique, par le Cap de Bonne-Espérance. Dans les années 1780, 81, 82, 83, 84 & 85; 2 vols. xx, 562 p., 11 (2 folded) pls, new hcloth. A few plates slightly foxed or browned, two pages repaired, small worm hole in outer margin of a few pages in volume one. This scarce early edition was published in Brussels by Benoit Le Francq.

Classic and very important early narrative of South Africa. The plates depict the local fauna (birds, giraffe etc.), local inhabitants and views.

TA00014 **VAILLANT, F. LE, 1795-1798.** €1170,00 [Picture on our website!](#)

Voyage de F. Le Vaillant dans l'intérieur de l'Afrique, par le Cap de Bonne-Espérance: nouvelle édition, revue, corrigée et considérablement augmentée par l'auteur, ornée de vingt figures en taille-douce, dont huit n'avoient pas encore paru / Second Voyage dans l'intérieur de l'Afrique par le Cap de Bonne-Espérance, dans les années 1783, 84 & 85: par F. Levassier; 5 vols. xxxii, 787 & xlv, 1255 p., 20 (7 folded) & 22 (5 folded) pls, contemporary full marbled calf, spine and borders of covers gilt, with red and green labels. Volume one rebacked and with some wear of gilding on spine, small unobtrusive hole in first plate, previous owner's name (Caladroy) written in old hand on title-pages, lower corner of a few pages and one plate of vol. 4 with waterstain, not or hardly affecting the text.

Attractive set of these very important early narratives of South Africa. The plates depict the local fauna (birds, giraffe, hippopotamus, hyena, monkey), local people and numerous views.

BG04215 **CAMERARIUS, J., 1605 (1590-1595).** €900,00 [Picture on our website!](#)

Symbolorum et emblematum ex re herbaria desumptorum centurio una / Symbolorum & emblematum ex animalibus quadrupedibus desumptorum centurio altera; 2 vols (in one). c. 102, c. 104 p., 200 circular engraved emblems, contemporary marbled calf (spine gilt, upper end spine worn). Some offsetting and browning.

The first two of the four "centuriae" as they were re-edited collectively by Camerarius' son Ludovicus in 1605, with the original title-pages but (as Ludovicus explains in his own preface) without the prefaces, dedicatory poems, and indexes of the original edition.

The first volume contains 100 botanical emblems and is the first botanical emblem book and one of the first botanical books to be illustrated with metal engravings. The second book is devoted to quadrupeds. The text reflects both Camerarius' humanist and botanical backgrounds. Camerarius (1534-1598) was a Nuremberg physician and botanist.

EG09874 **SWAMMERDAM, J., 1669 (1ST ED.).** €2900,00 [Picture on our website!](#)

Historia Insectorum Generalis, ofte Algemeene Verhandeling van de Bloedeloose Dierkens; [26], 168, 48 p., 13 (12 folded) handcoloured engraved pls, 2 vignettes, 1 folded table, contemporary (or slightly later) half vellum with marbled boards (boards somewhat worn). Some plates somewhat browned. Some very slight scattered foxing (mostly in first few pages). Library stamp at rear of title-page "Grosherzogliche Bibliothek Neustrelitz" (with discard stamp dated 1950).

The very rare first edition in Dutch of this book which is considered (together with the works of Redi and Malpighi) to be the starting point of modern entomology and microscopy.

No coloured copies of this book are known. At least Landwehr does not mention it in his book "Studies in Dutch books with coloured plates published 1662-1875: Natural history, topography and travel, costumes and uniforms". In fact we believe that the colouring was done in 1745, as underneath the first plate there is the following inscription in the same yellow colour as the the plate border/cadre: 1745 No. 5. Three capitals and the two vignettes are also hand coloured. We added Schierbeek, 1946. Jan Swammerdam. Leven en Werken (280 p., 28 pls, folded table). Biography and Bibliography (in Dutch).

James Edward Smith acquired the collection of Linnaeus, and was the first president of the Linnaean Society. This volume includes his travels through The Netherlands (Holland), Belgium, France, and part of his travels through Italy (Genoa, Pisa, Florence, Sienna, Rome). His charming accounts of his encounters with the great Natural History scientists (mostly botanists) of their time make this book great reading.

IG11145 **BASTER, J., 1759-1765 (1ST ED.).** €3000,00

Natuurkundige Uitspanningen, behelzende eenige waarneemingen, over sommige Zee-Planten en Zee-Insecten, benevens derzelve zaadhuysjes en ijernesten; Two vols in one. 169, [4], 167, [4] p., 29 plates of which 27 are hand coloured, contemporary half, spine gilt, boards covered with Dutch marbled (spickled) paper (a few pieces of paper missing), outer edges with wear due to use, but spine is complete and binding is tight. Old library ex libris at verso front cover. A few pages with some faint foxing but the great majority of pages and all plates clean. Baster's book appeared in six instalments, each with a separate title-page which were often discarded when bound (they are not present in this copy), and replaced by two general title-pages for the volumes (as in this copy).

Baster's book has become famous for being one of the first describing and depicting a local marine fauna, and including the smaller, less obvious animals in his works. His book has become very rare, and we have the pleasure to offer a first Dutch edition (dated 1762-1765, but actually appeared between 1759 and 1765) with almost all plates hand coloured.

We also have also on offer the work by Slabber (1769-1778) who followed in Baster's footsteps; please inquire.

IG07139 **BROCA, P., 1860.** €80,00

Études sur les animaux ressuscitants. Rapport lu à la Société de Biologie, les 17 et 24 mars 1860, au nom d'une commission composée de MM. Balbiani, Berthelot, Brown-Séguard, Dareste, Guillemin, Charles Robin; 139, [3] p.; 1 plate, disbound (no covers).

Broca was the rapporteur for the committee of the Société de Biologie investigating the phenomenon of the revival of dessicated organisms, such as rotifers, after they had been brought in contact with water. The committee sought to answer the question whether, in such cases, a dead organism had been brought back to life or a living organism had passed from a passive to an active state.

We added two papers on the same subject: Gavarret, ca. 1860. Quelques expériences sur les Rotifères, les Tardigrades et es Anguillules des mousses des toits (16 p.) & Fromentel, 1877. Recherches sur la revivification des Rotifères, des Anguillules et des Tardigrades (16 p.).

Natuurlyke historie van de koraal-gewassen en andere dergelyke zee-lighamen, die men gemeenelyk vind op de kusten van Groot-Brittannien en Ierland: benevens eene beschryving van een Grooten Zee-polyp, In den Zomer van 't Jaar 1753 by den Noord-Pool door de Walvis-vangers gevonden. Uit het engels vertaald door Jan Tak; xvi, 118 p., 39 (some folded) engraved pls, engraved frontispiece (depicting imaginary seabed floor grown with hydroids and bryozoans), contemporary half (somewhat worn, but tight binding) boards covered with contemporary Dutch marbled (spickled) paper.

First and only Dutch edition of "Essay towards a Natural History of the Corallines (1755)", in which mostly hydroids are described and depicted, but also bryozoans, polychaete worms, egg hulls of molluscs etc. Includes the description and plate of the Cuff Microscope. John Ellis (1710 - 1776), was a well known naturalist, in this book he proved the animal nature of the corallines (hydroids and bryozoans).

IG11146 **SLABBER, M., 1769-1778.** €1860,00

Natuurkundige verlustingen, behelzende microscopise waarnemingen van in- en uitlandse water- en land-dieren; [10], 166 p., 18 hand coloured folded plates, new marbled half with black label, boards covered with contemporary Dutch marbled (spickled) paper (sourced from another book), contemporary end papers were used too. Two pages with a few little spots, but the remainder of the pages and all plates remarkably clean. Slabber's book appeared in 18 instalments, each with a separate title-page.

Slabber's was much influenced by Baster's book which appeared somewhat earlier. Every instalment describes one or several small animals which are often depicted on a larger scale by the use of early microscopes. Each instalment is dedicated to Slabber's friends or influential persons.

Except for a German translation there were no further editions of this book, and all the copies of the Dutch edition I have seen are with coloured plates.

We also have also on offer the work by Baster (1759-1765) who was Slabber's inspirator; please inquire.

TL09043 **MOLINA, G.I., 1782-1787 (1ST ED.).** €1500,00

Saggio sulla storia naturale del Chili / Saggio sulla storia civile del Chili; 2 vols (complete). 367, [1], 333, [1] p., 2 folded maps, contemporary marbled, full calf (spine and borders of front and back covers gilt). Some browning in a few pages, first end papers missing, otherwise a good, attractively bound copy of the rare first edition on this classic work on Chile.

TL03431 **MORELET, A., 1857.** €750,00

Voyage dans l'Amérique centrale, l'île de Cuba et le Yucatan; 2 vols. [4], 337, (4), 323 p., 22 fine wood-engraved half-page illustrations after drawings by the author heading each chapter, 2 pls depicting musical notations, contemporary half. The map is missing in this set, some slight foxing throughout. Rare work on Central America.

Arthur Morelet (1809-1892) was a French natural scientist (we have also several of his papers on molluscs, please inquire), and was the first to explore the vast territory of Guatemala. Morelet indicated that he had deposited at the Museum 90 cryptogamic plants, 150 species of molluscs which were still undescribed, 32 species of unknown fish, 104 reptiles, 70 birds and 57 mammals, furthermore he made important observations on the geography, ethnology and archeology of the areas visited.

TL00420 **SACHS, C., 1879.** €120,00

Aus den Llanos. Schilderung einer naturwissenschaftlichen Reise nach Venezuela; x, 369 p., 10 figs, frontispiece, contemporary half (rubbed, one joint with few worm holes). Small library stamp of Dr. Semjén Béla.

MG11264 **LINNAEUS, C. [LINNÉ], 1767 (12TH ED.).** €460,00

Systema Naturae, per regna tria naturae, secundum classes, ordines, genera, species cum characteribus, differentiis, synonymis, locis. Editio decima tertia, ad Editionem duodecimam reformatam Holmiensem; Vol. 1 (Zoology part) bound in two volumes. 1327, [1], [36 = index and addenda] p., contemporary, polished full calf (skillfully rebacked, with new red labels. This so-called "thirteenth" edition is a page-for-page reprint of the rare twelfth edition published in 1766-1768. The 12th edition is of great importance as it was the last edition revised by Linnaeus and which includes more species than the famous 10th edition. We offer here the first volume, Second part treating insects, molluscs and other invertebrates. Of this "edition" two more volumes appeared in 1770 on botany and geology.

Ueber den Generationswechsel, oder die Fortpflanzung und Entwicklung durch abwechselnde Generationen, eine eigenthümliche Form der Brutpflege in den niederen Tierklassen; xviii, 140, ii p., 3 folded pls, new cloth [original printed covers (chipped-repaired) bound in]. Front cover and title-page with several stamps, blind stamp and inscriptions of previous owner's. One plate with annotations in a contemporary hand. Very scarce and important work.
This is one of the works that brought Steenstrup scientific fame. In his 'alternation of generations' theory, in which the offspring in some kinds of invertebrates do not resemble the parents, but earlier generations. The German edition appeared in the same year as the Danish one, and would later (1845) be translated into English by the Ray Society.

"Greatly expanded and rewritten by Johannsen in German, it became in 1909 the first and most influential textbook of genetics on the European continent. About half of the book was devoted to the mathematical and statistical methods needed in the analysis of the quantitative data arising from experiments in genetics. This was what "exakten" in the title meant, not pretensions on the part of a new biology but, rather, delimitation of that part of a heterogeneous field which could be dealt with by quantitative methods to verifiable facts. In this book Johannsen defined the basic concepts of a new science - "gene," "genotype," "phenotype" - and forecast the effects to be expected from it upon the central problem of biology, that of the mechanism of organic evolution. The Elemente appeared in revised editions, the third (and last) in 1926. Many European biologists owed to it their introduction to genetics" (DSB).
